## Summary:

**Senior Frontend & Mobile Developer** with over 10 years of expertise in designing and executing high-impact web and mobile applications across diverse industries, including **e-commerce, cloud-based ERP, billing, education, and telecommunications**. Proven track record of leading **cross-functional** teams, optimizing **engineering processes**, and delivering complex projects on time. Skilled in various **programming languages**, frameworks, and **agile methodologies**. A passionate **tech influencer** and **innovation advocate**, committed to driving technological advancements and enhancing user experiences.

## Professional experience:

Senior Frontend Developer (team lead) @ Prospect LLC

**Baku, Azerbaijan**

Dec 2017 - Jan 2024

### **Achievements:**

- Became a lead developer during the first 3 months
- **Led my team to win the “Most Productive and Creative Team” trophy** for several consecutive years, recognizing outstanding innovation and efficiency within the company.
- **Conceptualized and fully managed the development of a learning web application “ProspectAcademy”** from inception to launch, leading the project to win the **NETTY** award for ‘Best Educational Website of the Year.’ The platform achieved significant success, gaining recognition for its innovative approach and impact in the educational sector.
- **Secured three prestigious NETTY awards** at the state level: Best Educational Website of the Year, Best Corporate Website of the Year, and Best Product Website of the Year.
- **Scaled the development team from 3 to 8 members**, driving team growth and significantly enhancing project capacity.
- **Successfully delivered multiple high-impact projects** in collaboration with the Product team, resulting in heightened customer retention and improved satisfaction. These initiatives played a key role in enhancing overall business performance.

**Responsibilities:**

- Lead a dynamic team of frontend developers in designing and implementing user interfaces for an ERP project
- Worked together with designers and backend developers within our cross-functional team.
- Developed responsive and user-friendly web applications using technologies such as **ReactJS**, **NextJS**, **React Native**, **AntDesign**, **Redux**, **Context API**, **Socket.io**, **SipJs**, **Figma**, and **NodeJS**, **ElectronJS**, consistently meeting and exceeding project deadlines.
- Set up feedback culture using Radical Candor
- Set OKRs for developers.

## Frontend Developer @ Proline LLC

**Baku, Azerbaijan**

Oct 2015 - Dec 2017

**Achievements:**

- **Improved page load times by optimizing code**, reducing bundle sizes, and implementing lazy loading.
- Increased user engagement by implementing responsive design best practices and enhancing UI/UX based on user feedback.
- Reduced bugs and improved user satisfaction after leading a major front-end refactor focused on usability and accessibility improvements.
- Implemented automated testing using tools like **Cypress** and **Jest**, increasing code quality and reducing post-release bugs.
- Played a crucial role in launching a mobile-responsive version of a critical app, leading to escalated mobile accessibility.
- Worked closely with **backend developers**, **Product Managers**, and **UX/UI designers** to ensure seamless integration of front-end features with backend systems.
- **Actively mentored junior developers**, helping them improve their skills with ReactJS and contributing to the team's overall productivity.
- **Conducted code reviews** that led to identifying critical bugs early, enhancing the stability of the codebase.

### **Responsibilities:**

- **Developed and maintained scalable web applications** for diverse projects such as an **examination system, billing system, and bank members club**, ensuring robust performance and seamless user experiences.
- **Implemented responsive UI/UX designs** using modern frontend technologies, including **NextJS, ReactJS, React Native, Styled Components, TailwindCSS, Bootstrap, and React Query**, optimizing usability and accessibility across platforms.
- **Collaborated closely with cross-functional teams** including backend developers, designers, and product managers to deliver high-quality, feature-rich applications on time.
- **Integrated and customized third-party APIs** and libraries to enhance application functionality and streamline development processes.
- **Optimized front-end performance** through effective state management, code splitting, and asynchronous data fetching, improving load times and user interaction.
- **Conducted code reviews and mentored junior developers**, fostering a collaborative environment and ensuring code quality and consistency across the team.
- **Led debugging and troubleshooting efforts**, identifying issues and implementing solutions to ensure stability and smooth operation of applications in production.

## Backend Developer @ Ponet LLC

**Baku, Azerbaijan**

Oct 2010 - Dec 2015

### **Achievements:**

- **Scaled the development team from 6 to 14 members**, driving team growth and significantly enhancing project capacity.
- **Mentored and developed junior talent**, with two mentees achieving **Zend Certified PHP Developer** status, contributing to a 30% improvement in team productivity and project delivery times.
- **Successfully scaled the ERP system**, integrating complex modules such as Call Center, Logistics, CRM, and Task Management, which improved operational efficiency by 40%.

### **Responsibilities:**

- **Mentored and coached junior developers**, enhancing their technical skills and increasing their development level, contributing to improved team performance.

- **Developed and maintained an ERP solution** with complex modules, including **Call Center, Logistic, CRM, Task Management, and Meeting modules**, utilizing **Vanilla PHP, Symfony framework, PostgreSQL, MsSQL, and MySQL**.
- **Led backend development** for several key projects:
  - **Order app for government emergency medical service (103)**, using **PHP, PostgreSQL, and JavaScript** to optimize emergency response operations.
  - **Library systems for 5 government institutions**, using **PHP, Symfony, and MySQL** to streamline library management processes.
  - **Examination system for civil service entrance**, ensuring scalability and reliability with **Symfony, PostgreSQL, and JavaScript**.
  - **Examination system for Baku State Medical College**, developing a robust platform to support the examination process with **PHP, PostgreSQL, and JavaScript**.
- **Implemented scalable backend architectures**, prioritizing performance, security, and maintainability.
- **Collaborated with cross-functional teams**, ensuring smooth integration of backend and frontend systems, improving overall system efficiency and user satisfaction.

## Prior experience @ Self-Employed

### **Baku, Azerbaijan**

Aug 2008 - Dec 2015

- Cooperated closely with clients to understand their business needs and requirements, providing technical expertise and delivering tailored solutions.
- Developed responsive and visually appealing user interfaces using **HTML, CSS, and JavaScript**, ensuring optimal user experience across various devices.
- Architect and implemented backend systems, utilizing **Vanilla PHP** and **MariaDB** to handle data storage, retrieval, and processing.

## Education:

- 2004-2008 **Bachelor of Computer Engineering** at Azerbaijan International University

## Languages:

- English - Fluent
- Azerbaijan - Fluent
- Turkish - Fluent
- Russian - Fluent
